# LC-POWER

1. Mounting options: CPU, GPU, 3,5" HDD and fans/water-cooling radiators

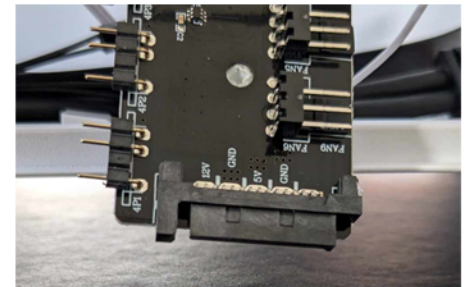

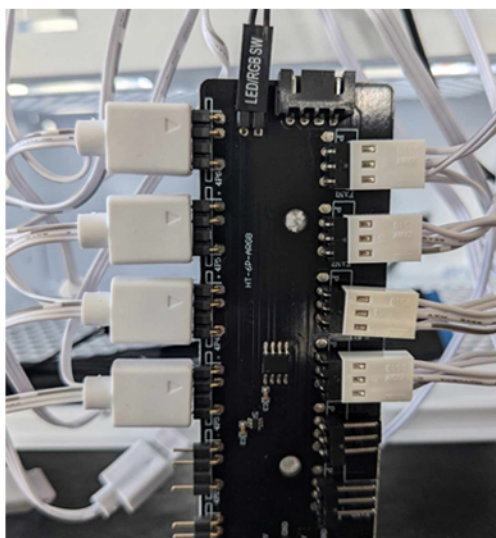

2. Mounting options: 2,5" SSD/HDD and PSU

3. USB, Audio, and mainboard connectors (please consult your mainboard manual for the matching sockets)

4. Fan controller hub (plug in a SATA connector of your power supply)

5. Completed: You are ready to adjust the lighting via the reset button of your case.

6. If you want to control the fans via your mainboard software, you need to disconnect the ARGB and power connectors of the fans from the fan controller hub.
Connect all fans via the additional daisy chain connectors on each fan.
The last free connector can then be connected to the mainboard (ARGB and case fan sockets).
